By

www.websitedesign.co.za and www.search-engine-optimization.co.za

Certificate added to domain on the: 19th June 2013
 Certificate template date: 18th June 2013.

Notes:

- **Search Engine Optimization** (otherwise referred to as SEO) is when certain principles, tasks and actions are taken to influence search engines to understand and better rate a website and its pages for position/s on their search results.
- **SEO sessions 1-3** are core steps, to use an analogy : "we build a great car, put it on a race track and fill the tank with gas - the car will go fast and far" the tank will eventually run out and you will be left with a great car but the position you ran out of gas is where you will stay, and other cars will eventually overtake you" Refuel your tank with extra sessions:
- **SEO Session 4+** are steps that need to be taken whenever a competitor changes their website, or there is a new website is launched or the search engines change their ranking policies - as you can imagine, these things happen daily, therefore we recommend at least 1 session per month - you can consult with us to determine how often sessions are required). To use an analogy : "each session will refuel your tank and keep your car racing"
- The industry, service, product and location associated with a website and its pages, the size and type of website, and the search engine algorithms and rules are some of the many factors that influence SEO results. **SEO is a marketing investment for a website owner.**

Session	Task / Description / Detail	Completed Date	Notes History
		Not Done.	None please optimize your website.
1-3	Review of client brief, and Keyword Assessment and implementations on primary pages. 15 min consult with client explaining Keywords; and business marketing strategy relating to SEO as well as certificate. (Add primary keywords)	27/02/2013 19/06/2013 02/10/2013 17/02/2014	Done
